

Extend Learning to All Users with SumTotal Mobile

Organizations require a mobile learning solution that provides far more than just a browser on a mobile phone. They are looking for a complete solution to provide a rich learning experience.

+30%
of organizations surveyed currently deliver some amount of learning content through mobile platforms.

*Source: Research conducted by the eLearning Guild

The SumTotal Mobile functionality allows content and courseware to be viewed and accessed across a wide range of smartphones and mobile devices. SumTotal Mobile includes application support for Apple® iPhone®, iPod® and iPad®, Google™ Android™ and Blackberry® with native LMS style sheet support for netbooks and other tablet and appliance devices. With an engaging application interface, easy to use functionality and enhanced content performance, this solution delivers an impactful learning experience through rich media optimized for viewing and consumption on your mobile device.

In addition, customers can build content in SCORM authoring tools (such as Toolbook, Lectora or Claro). This critical mobile learning functionality allows more user-generated content to be mobile-accessible without requiring licenses to authoring tools or changes to the instructional design formatting of the course.

SumTotal Mobile Key Capabilities

Engaging

- Provides rich-media (audio and video) delivery for optimum effectiveness
- Interface adapts itself to fit the size of your screen and browser

Simple

- Easy to use
- No scrolling to view content on your mobile device
- Viewable mobile course catalog

Key Benefits

- Increase training opportunities as learners access content in the moment
- Mobile users can find, access and acquire all the information they need within the LMS
- Allow customers, with no computer infrastructure to the direct user, the ability to provide learning via mobile devices or 'internet appliances'
- Customers can leverage SCORM authoring tools to build compelling mobile content
- End users can engage in a completely offline learning experience accessing mobile-friendly content from these devices. Rich media and video can be used without any risk of a poor experience due to intermittent internet or bad cell connections
- Use the native SumTotal Learning reporting capabilities to track completions, scores and overall impact using LMS standard reports, adhoc reports and any reports within the data analytics engine

From left to right: **Apple® iPhone®, Apple® iPad®, Google™ Android™, BlackBerry®**

Enhanced

- Increased performance means no waiting or streaming of content
- Content can be downloaded locally to the device for offline and truly mobile use

Targeted

- Push mobile content access to specific users or groups
- Mobile courses can be auto-assigned via SumTotal Learning utilities

Secure

- Security features prevent unauthorized sharing or use
- Authenticates to the LMS via login
- Licenses can be controlled via license management capability of the system

Automatic

- Syncs and updates LMS records and reports

About SumTotal
